

▶ KASPERSKY ENDPOINT SECURITY 10 FOR WINDOWS

See how Kaspersky's protection for Windows® evolves with your security requirements.

Powerful security measures you can deploy and use without additional resources or lengthy project initiatives.

As your IT protection requirements increase, Kaspersky has a security level that's right for you!

Product tier	Cumulative Windows endpoint security features	Additional security and management features included at this level	Endpoint security centrally managed via Kaspersky Security Center
SELECT	<ul style="list-style-type: none"> • Anti-Malware • Firewall • Application Control • Web Control • Device Control • Windows File Server Protection 	<ul style="list-style-type: none"> • Cloud-Assisted Protection via Kaspersky Security Network • Mobile Device Management • Mobile Endpoint Security (for tablets and smartphones) • Application Whitelisting 	Yes
ADVANCED	All the above, plus: <ul style="list-style-type: none"> • Data Encryption 	All the above, plus: <ul style="list-style-type: none"> • Advanced Vulnerability Scanning • System Configuration and Deployment • Patch Management • HW / SW Inventory • Network Admission Control 	Yes
KASPERSKY TOTAL SECURITY FOR BUSINESS	All the above	All the above, plus: <ul style="list-style-type: none"> • Mail Server Security • Web/Internet Gateway Protection • Collaboration Security (incl. SharePoint® Server Protection) 	Yes

KEY BENEFITS

EXPANDABLE FOR PROGRESSIVE PROTECTION

As your security needs evolve beyond endpoint anti-malware, you can unlock new features of Kaspersky Endpoint Security 10 for Windows and Kaspersky Security Center to meet the coming threats to your organization. See the above chart to determine which level is right for you.

SUPERIOR MALWARE DETECTION AND REMOVAL

Your Windows systems are protected with proactive, signature, and cloud-based detection technologies.

EASE OF MANAGEMENT

Virtual and physical nodes are managed using the same policies. That same console (Kaspersky Security Center) manages your Apple and Linux endpoints, too.

ENDPOINT ANTI-MALWARE FEATURES:

SIGNATURE-BASED PROTECTION WITH FREQUENT UPDATES

Industry-proven traditional signature-based method for detecting malware threats.

HEURISTIC AND BEHAVIORAL ANALYSIS

Delivers proactive protection against threats that have not yet been recorded in signature databases.

ASSISTED PROTECTION FROM THE CLOUD

The Kaspersky Security Network (KSN) provides a response to suspected threats, much faster than traditional methods of protection. KSN's response time to a malware threat can be as little as 0.02 seconds!

PERSONAL FIREWALL AND HOST-BASED INTRUSION PREVENTION SYSTEM (HIPS)

Predefined rules for hundreds of the most common applications reduce time spent on configuring the firewall.

FEATURE LEVELS THAT ARE TARGETED TO YOUR NEEDS:

POLICY CONTROL ISSUES?

With Kaspersky Endpoint Security 10 for Windows at the Select tier, easy to use Application Control, Device Control and Web Control are enabled.

NEED TO SECURE A MOBILE WORKFORCE USING TABLETS AND SMARTPHONES?

Beginning with the Select tier, you can benefit from Mobile Device Management (MDM) and an endpoint application to install on your Android™, BlackBerry®, Symbian and Windows mobile devices.

NEED TO PROTECT DATA ON LOST OR STOLEN DEVICES?

Kaspersky Endpoint Security for Windows adds the security of Advanced Encryption Standard (AES) 256 bit encryption in both the Advanced and Total Security tiers. Choose from full-disk or file level.

ARE YOUR IT TOOLS TOO COMPLEX?

Within the Advanced and Total Security tiers, you'll benefit from the simplicity of Systems Management which includes PC configuration and provisioning tools combined with advanced patch management, Network Admission Control plus inventory and licensing tools.

LOOKING FOR PEACE OF MIND FOR THE ENTIRE NETWORK?

Kaspersky Total Security For Business combines all the features of Kaspersky Endpoint Security 10 for Windows plus mail, collaboration and internet gateway security.

IS YOUR ENDPOINT SECURITY SOLUTION TOO COMPLICATED?

All of Kaspersky's endpoint features are managed under a single console; all written from the same codebase. You can trust Kaspersky to simplify your security.

How to buy

Kaspersky Endpoint Security for Windows is included in each feature-rich tier of Kaspersky's Business Solutions (Select, Advanced and Total Security).

Windows file server protection is also available separately.

For more information on Kaspersky Endpoint Security for Windows contact Kaspersky or your IT security reseller.

NOT ALL FEATURES ARE AVAILABLE ON ALL PLATFORMS.
