**Mobile Business Intelligence
to Help Your Workforce Run
Smarter Anywhere**

The Best-Run Businesses Run SAP™

**Get on-the-go BI with
SAP® Crystal solutions**

Get on-the-go BI with SAP® Crystal solutions

Decision making doesn't just happen in the office building or the conference room. The speed of today's business requires your organization to take action and deliver results from anywhere. SAP® Crystal Server software, with its add-on for mobile solutions, gives [the power of here-and-now analytics](#) to your workforce, so they can engage customers and take action with confidence.

With functionality native to your mobile device, SAP Crystal Server aligns the delivery of information with the need for instant data consumption. Whether on the move, at a customer site, or on the shop floor, your workforce can access content from SAP Crystal Reports® and data exploration software in a fast, self-service format that keeps your information secure. And because it's an SAP Crystal solution, you know you're getting business intelligence (BI) that any employee can start using quickly for improved productivity and insight on the go.

Get insight whenever and wherever

Get insight whenever and wherever

Get started right away

Get security and control

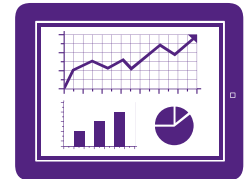

With the mobile functionality in SAP Crystal solutions, employees can use BI and reporting apps on mobile devices to instantly access reports or intuitively explore data. Touch-screen navigation and native iOS visualizations let your mobile workforce ask and answer business questions from anywhere.

Self-service search and data exploration prevents IT bottlenecks and allows users to easily find answers to help them close sales deals, perform rapid analysis on orders, review financial information, or access material delivery data.

Monitor different perspectives of your business through exploration views – with contrasting visualizations, all on a single screen for quick insight, at any time. (See the [figure](#) on the next page.)

With mobile access to key performance indicators and data held in documents created with SAP Crystal Reports, your staff can have instant access to customer-centric data needed to quickly resolve questions and issues. The flexibility to be more hands-on with customers and clients, wherever they are located, improves customer satisfaction and employee productivity.

Give your salespeople immediate access to the information they need to build customer satisfaction.

The add-on for mobile solutions brings mobile functionality to SAP Crystal Server that can be deployed quickly, leveraging popular mobile device management software. Your users can be up and running quickly with instant access to existing reports and analytic data. Security and administration policies from your SAP Crystal Server deployment are automatically applied to each user, extending the trusted reliability of the desktop to the mobile device.

Go mobile with SAP Crystal Server, quickly and reliably.

Get security and control

SAP Crystal Server makes sharing information easy but also keeps that information secure. The solution is a solid foundation that can grow as your needs change and grow.

Your IT department can securely and easily transmit content over a wireless connection to mobile devices from centrally managed sources, giving users 24x7 access to critical data and reports. (See examples in the [figure](#) on the next page.) SAP Crystal Server preserves high data quality, and IT maintains full audit control. Preconfigured settings improve installation speed without requiring additional management software.

Administrators have the option to block passwords from being stored on the devices for even tighter security. All login credentials are encrypted before transmission.

SAP Crystal Server helps eliminate worries about security in your mobile environment.

Get BI that anyone can use anywhere

Get BI that anyone can use anywhere

SAP Crystal solutions keep things simple. These entry-level BI solutions from SAP provide easy-to-use analytics, can access virtually any data, and are an affordable way to get the essential BI tools for your business.

With the simplicity of Internet search and the power of data exploration, users get the answers they need to take action right away. They can access intuitive, self-service reports and explore data with stunning visualizations, easily sharing information views and formatted reports across the organization.

Use SAP Crystal solutions to arm your employees with insight so they can act quickly and make smarter, more effective decisions.

Take advantage of this affordable way to get the power of analytics into the hands of your mobile workforce.

Objectives

Summary

SAP® Crystal Server software, combined with the add-on for mobile solutions, lets you take business intelligence (BI) on the road and run smarter, anywhere. Enable your mobile workforce to view and search reports from mobile devices with the power of here-and-now analytics, so your organization can be responsive to customers, engage partners, and act with confidence. Because the software fully leverages SAP Crystal solutions, users get the latest information securely and quickly via centrally controlled content deployment.

Objectives

- Enable staff to make time-critical decisions whether inside or outside the office
- Bring mobile functionality to your SAP Crystal Server implementation at an affordable price
- Minimize IT involvement

Solution

Benefits

Quick Facts

Solution

- Mobile access to rich reports
