

# Adobe Education Enterprise Agreement

Give your institution access to new industry-leading creative tools.

The Adobe Education Enterprise Agreement (EEA) is an easy-to-manage, term-based licensing program that gives educational institutions access to new versions of Adobe® Creative Cloud™ desktop applications.

With this new term-based licensing program, your department or institution can have the creative tools it needs to be more productive, foster creativity in teaching and learning, and help students develop the digital communication skills essential for success in college and beyond.

## Benefits of an EEA for your department or institution

The EEA program provides access to new versions of the same industry-leading creative tools used by professionals. EEA product collections were created to meet the specific needs of educational institutions like yours and include the same applications available with Creative Cloud membership. Additional EEA benefits enable you to:

- **Provide access** to Adobe creative tools for educators, students, and staff on institutionally owned or leased computers.
- **Keep your department or institution up to date** with new software features and technology innovations.
- **Make purchasing easier** with a single annual purchase order. This lets a department or institution avoid the hassles and costs related to placing multiple orders.
- **Deploy with flexibility** by choosing from multiple distribution options. Pick one that best meets the needs of your department or institution.

## EEA program licensing options

### Primary and secondary schools

A primary or secondary school may enroll in the EEA and be covered as a single school site, or multiple schools may enroll and be covered under a legal entity\* that has responsibility for the procurement and contract management of multiple primary and secondary schools (district, county, state, government agency, and so on). Enrolling primary and secondary schools are licensed on a per-FTE (full-time equivalent) basis and must cover the entire school or legal entity.

### Higher education institutions

Higher education institutions may cover the entire institution on a per-FTE basis, or they may elect to purchase licenses on a per-installation basis. Please note that licensing of an entire higher education institution on a per-FTE basis may not be available in all locations and is currently not available in the United States, Canada, and Japan. Institutions in the United States, Canada, and Japan that need to license on a per-FTE basis should contact their Adobe sales representative for a more customized solution.

## Supporting student success

Purchasing the leading design and creative collections from Adobe through the EEA licensing program helps institutions ensure everyone has the tools they need for creativity, curriculum development, and career preparation. With the proper tools in hand, students can express themselves in new ways while developing the digital skills needed to succeed in college and on the job once they graduate. And educators get the tools they need to engage and inspire.

#### Hosted Services

The software offered through the EEA integrates with a variety of Hosted Services, operated either by Adobe or by third parties, which may contain user-generated content that may be (a) inappropriate for minors; (b) illegal in some countries; or (c) inappropriate for viewing at work. A complete list of integrated services is available here: [www.adobe.com/go/integratedservices](http://www.adobe.com/go/integratedservices). If Customer wants to prevent viewing of or access to user-generated content services, it may (a) disable service access in the Creative Cloud Packager, where that functionality is made available, or (b) block access to the Hosted Services via its network firewall. Hosted Services are not, under any circumstances, available to users under the age of thirteen (13).
