APC Back-UPS®

Power-Saving, high performance power protection for office computers

The Back-UPS Pro also includes unique “green” features, like power-saving outlets that automatically turn off idle peripherals. A high efficiency charging system and “AVR Bypass” also reduce power consumption. With the rest of the Back-UPS Pro’s standard features, this is the perfect unit to protect your productivity from the constant threat of bad power and lost data

APC Smart-UPS®

Advanced line interactive power protection for servers and network equipment.

Award-winning Smart-UPS® protects critical data by supplying reliable, network-grade power in either traditional tower or rack- optimized convertible form factor.. Included PowerChute® management software provides IT administrators the comfort of safe system shutdown and advanced UPS management.

“GREEN” Power-Saving Surge Protectors

All 4 models provide guaranteed protection (for life) from surges and spikes. The P4GC and P6GC also offer an LCD Timer that can be used to turn power off and on again to help you reduce energy use. The P7GB and P8GT provide APC’s Master/Controlled outlet feature which saves energy by detecting when your computer is asleep and then automatically turning off power to your connected peripherals. Why use an ordinary surge protector when you can use one that pays for itself?

Offer may not be combined with APC’s Trade-UPS upgrade program. APC reserves the sole right to change or discontinue the program at its discretion without notice. Promotion Valid from 4/1/2011 to 6/30/2011 ONLY
