

Get clear on the value of Office 365

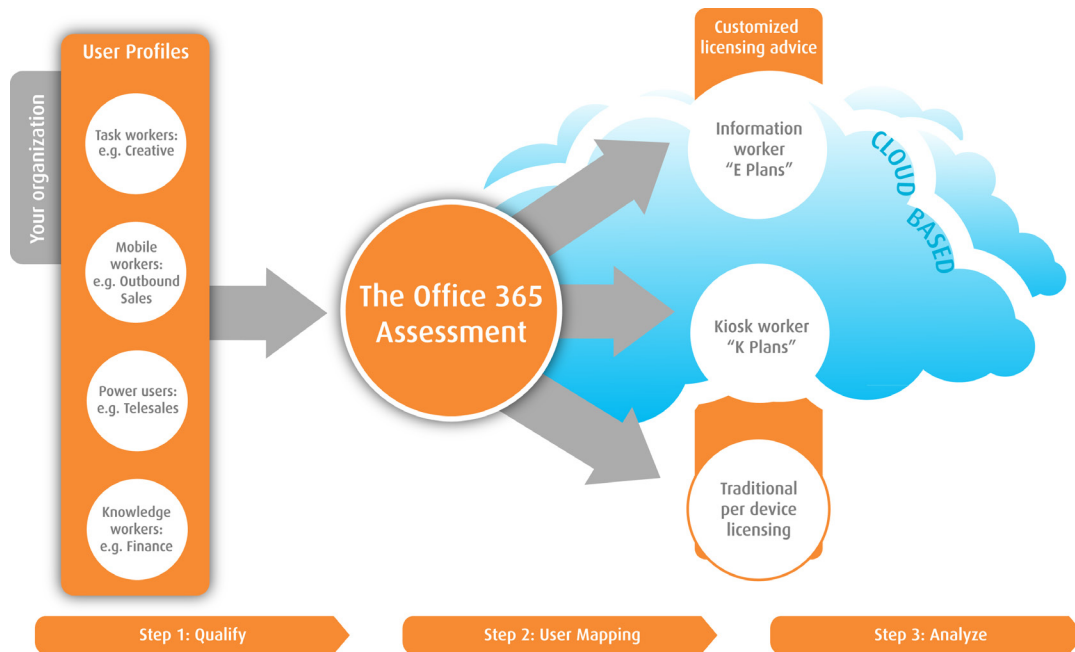

Office 365 offers a revolutionary way to take advantage of the latest Microsoft applications, simplify IT management and leverage a compelling per-user licensing model. But with more choice and flexibility, comes more complexity – making it even more difficult to pick the right solution to fulfill your technological and business needs.

Simplify your strategy: Softchoice’s Office 365 Assessment

We created the **Office 365 Assessment** to paint a clear picture of whether this new subscription-based licensing model is technically viable and whether it will support your business goals. Our aim is to give you the peace of mind to make an informed decision on Office 365 and help you walk away with actionable insights to lead to an optimal transition.

Our methodology

- **Qualify first:** We start by investigating whether Office 365 is viable for your unique business and technological needs. At this stage we uncover the barriers to success that would make the solution a “no go.” We use our intimate, Gold-Certified knowledge of Microsoft technology to answer the key questions upfront, to ensure a closer look is needed.
- **User mapping and analysis:** Next we take a detailed look at the work habits of every single end-user in your environment. Our experts dig deep, using best-in-class reporting and cost analysis tools, to find the ideal licensing path for each user in your organization. Because Office 365 is available in several distinct options, we design a tailored solution, so no extra money is spent, and you receive all the functionality you need.

Make the right Office investment. Contact your Softchoice sales representative today to begin the conversation.

Right-sizing your Office 365 licensing map involves 3 steps:

Step 1

Qualify your organization

What: Understand if Office 365 meets your needs

How: Survey of your unique IT environment; Identifying red flags such as reliance on IE6 or unique compliancy demands

Why: Delivers peace of mind that Office 365 is worth a deeper look

Is bringing your Office apps to the cloud viable?

Step 2

User Behavior and Requirements Mapping

What: Understand what licensing path individual users need

How: Inventory of IT environment to measure usage patterns, identify user behaviors, demands and oversights

Why: Gives you a one-of-a-kind map of your licensing requirements, based on what you really need

What's the bottom line?

Step 3

Licensing and Cost Analysis

What: Understanding the costs and implications of your user requirements map from **Step 2**

How: Our licensing experts analyze your profile and chart a clear, efficient path to licensing

Why: You get a full picture of the costs and make an informed decision

The Deliverable

Your Roadmap

You receive a customized report, containing an unbiased portrait of the costs and benefits of Office 365. This report is a detailed roadmap to help you build a compelling business case and find the way forward.

From dream to reality
