

Kaspersky Security Center 9

Introducing Kaspersky Security Center 9, our comprehensive, unified management console. On one hand, providing the administrator with broad, holistic visibility – but at the same time taking IT security controls to a never-before-seen granular level. There is no better way to manage risk in a more pre-emptive fashion. At the intersection of maximum IT flexibility and business productivity – is where Kaspersky Security Center 9 resides!

Be Ready for What's Next!

Key Features of Kaspersky Security Center 9

- ▶ **Support for Virtualized Environments** - Recognition of virtual machines in the corporate administration structure. Also includes automatic load optimization when the product performs intensive operations on virtual hosts.
- ▶ **Automated Virtual Lifecycle Processing** - Kaspersky Security Center 9 automatically detects, creates, and removes non-persistent virtual machines.
- ▶ **Vulnerability Scanner** - A useful tool for hardware and software asset reporting, this scanning tool is tuned to flag vulnerabilities to potential zero-day attacks. Includes an automated virtual patching feature.
- ▶ **Web Interface** - Remotely manage, monitor and report on key events from a flexible and accessible interface.
- ▶ **Mixed Environment Support** - Unmatched support for operating systems including Windows, Netware, Linux, Macintosh, VMWare, Lotus Notes/Domino, Exchange, Android, Blackberry and Windows Mobile.
- ▶ **Pre-Defined Policies** - Follow best practices with Kaspersky's pre-configured policies or create your own.
- ▶ **Automated mobile policies** - Kaspersky Security Center 9 allows you to set and enforce policies automatically when protected mobile devices leave the corporate network. Perfect for protecting a highly-mobile workforce.
- ▶ **Support any size network** - Whatever size infrastructure, Kaspersky Security Center 9 offers deployment and management tools, flexible policy options and robust reporting for small to medium businesses or large enterprises.

- **Remotely deploy Kaspersky to your network endpoints**
- **Centrally manage your Kaspersky protected devices**
- **Monitor your security status and report on events and vulnerabilities**

Refreshed Dashboard Views and Useful Information - A highly intuitive, improved GUI gives the administrator actionable information in their line-of-sight.

Powerful Control Tools:

- ▶ **Device Control** – Allows granular control of external device operations - enforces your usage policies and reduces the risk of data loss.
- ▶ **Vulnerability Scanning** – Avoid potential exploits by identifying system weak points, missing patches and neglected application and OS updates.
- ▶ **Application Startup Control** – Provides administrators the ability to grant, block and audit application launches.
- ▶ **Application Privilege Control** – Applies restrictions to various actions of applications in the operating system as well as rights to access computer resources.
- ▶ **Web Control and Content Filtering** – Monitoring and filtering users' browser activities by category, content and data type regardless of workstation location.

We invite you to take the Kaspersky Challenge today!

Try Kaspersky on your network or test lab for 30 days. If 30 days goes by and your incumbent software is keeping up with Kaspersky, then you can feel validated that you're adequately protected. But you should also test Kaspersky's management, automated tools, reporting and dashboard for flexibility and ease of use. Experiment with Kaspersky on your smartphones and other mobile devices. Does Kaspersky adapt to your complex network better? Are you able to use less staff resources to manage the Kaspersky deployment?

We encourage you to discuss your options with your solution provider, or contact us via email at smbsales@kaspersky.com or by phone at (866) 477-0347.

For a free 30-day trial and to take the Kaspersky Challenge, visit our website at kasperskychallenge.com.

Administration Server Requirements:

Software Requirements

Microsoft® Data Access Components (MDAC) 2.8+
 Microsoft® Windows® DAC 6.0
Database management system:
 Microsoft® SQL Server Express 2005, 2008, 2008 R2
 Microsoft® SQL Server® 2005, 2008, 2008 R2
 MySQL Enterprise.
 Microsoft® Windows Server® 2003+ , 2008+
 Microsoft® Windows® XP Professional SP2+
 Microsoft® Windows Vista® SP1+
 Microsoft® Windows® 7+

Hardware

1 GHz or higher
 512 MB Ram
 1 GB Available disk space

Administration Console Requirements:

Software Requirements

Microsoft® Management Console 2.0 or later
 Microsoft® Windows® XP
 Microsoft® Windows Server® 2003, 2008, 2008 R2
 Microsoft® Windows Vista® *
 Microsoft® Windows® 7 **
 * requires installed Microsoft® Internet Explorer® 7.0 or later.
 **requires installed Microsoft® Internet Explorer® 8.0 or later

Hardware

1.4 GHz or higher
 512 MB RAM
 1 GB of available disk space

Network Agent & Update Agent Requirements:

Software Requirements

Microsoft® Windows® operating system
 Linux
 Mac OS

Hardware

1.4 GHz or higher
 512 MB RAM
 32 MB available disk space for Network Agent
 500 MB available disk space for Update Agent
