

ThinkPad notebooks have earned worldwide acclaim for performing under the most demanding conditions on Earth. When you choose a ThinkPad notebook, with capabilities proven in environments ranging from rainforest canopies to mountain peaks, you can be sure you've got the right notebook for climbing the corporate ladder.

ThinkPad R Series

Performance and value for mainstream users

Editors' Review: 4 out of 5, *PC Magazine*, July 2007

These full-function notebooks continue the legendary ThinkPad tradition, with widescreen options, advanced power management, ThinkVantage Technologies and all the other popular R Series features. And they're powered by Intel processors that keep things running smoothly in an affordable package.

The new ThinkPad R61 14.1" widescreen starts at 5.2 lb. and 1.2" thin. The ThinkPad R61 15.4" widescreen starts at 6.4 lb. and 1.37" (1.39" for the 15" standard model). R Series models offer Intel Centrino Duo Mobile Technology and Intel Core 2 Duo processors.

ThinkPad T Series

Perfect balance of performance and portability

Editors Choice: 4.5 out of 5 *PC Magazine*, May 2007

Lenovo's flagship notebook series continues with the new ThinkPad T61. Designed for highly mobile users, these notebooks deliver outstanding functionality and long battery life in an easily portable, thin and light design. ThinkPad T61 models combine the best of performance and portability.

The new T61 14.1" widescreen model provides enhanced mobility in a 5.0 lb., 1.1" thin design. T61 15.4" widescreen models start at 5.9 lb and 1.2". Available with Intel Core 2 Duo processors and Intel Centrino Pro processor technology.

ThinkPad X Series

Thoughtfully designed for extremely mobile professionals

Editors' top ultraportable laptop *CNET*, June 2007

Ideal for on-the-go users who need an ultrathin, ultralight notebook but refuse to sacrifice quality, durability, or performance. Featuring extremely long battery life in a small form factor makes it easy to carry your business with you. Also available in a tablet version that allows you to do things such as take handwritten notes with the Tablet Digitizer Pen or even use your finger to interact via touch screen on select models.

The ultraportable ThinkPad X Series starts at 2.7 lb with an extremely small footprint. Available with Intel® Core™2 Duo processors and Intel Centrino® Pro processor technology.

ThinkCentre desktops deliver exceptional value and performance.

Outfitted with time-saving, productivity-boosting ThinkVantage Technologies and solid steel chassis for robust capability where it counts. Choose M Series models for their combination of security, durability, and long-term image stability. Or consider the A Series, designed and priced for small businesses, which may suits your needs better. Either way, you can't go wrong—and it's all wrapped up in a tool-less design.

ThinkCentre A Series

Quality choice and affordability for business

ThinkCentre A Series desktops offer a variety of models to fit your needs. Packed with power and expandability, they offer a great blend of essential features and technology at an affordable price. Provide your business with the latest technology today to keep ahead of tomorrow.

ThinkCentre A55 models include Intel Core 2 Duo processors for impressive multitasking capability. These processors provide increased performance, system responsiveness and energy efficiency. And you can choose state-of-the-art technology such as the Intel 946GZ Express chipset or SiS 662 chipset.

ThinkCentre A61 and A60 models come with AMD Athlon 64 X2 processors—delivering dual-core performance and increased efficiency. Built to handle multiple programs running simultaneously, dual-core technology means optimized office productivity for your ever-growing application needs.

ThinkCentre M Series

Stability and manageability for the large enterprise

ThinkCentre® M Series desktops offer a range of models to address your business needs.

From the advanced manageability

of the M55p, with Intel® vPro™ Technology, to the dual-core processing power of M55e, ThinkCentre M series is setting the industry benchmark for desktop PCs.

ThinkCentre M Series models include the latest Intel Core 2 Duo processors that boost performance by up to 40 percent while reducing energy-per-watt consumption. The ThinkCentre M55p offers Intel® vPro™ technology—the premier business platform from Intel for enhanced security, superior manageability, and energy efficient performance.
