McAfee

Protect what you value.

McAfee Network Security Platform

The industry's most advanced and proven intrusion prevention solution

Faster time to protection. Faster time to resolution. Faster time to confidence. McAfee® Network Security Platform (*formerly McAfee IntruShield*®) delivers knowledge-driven security that's integrated, automated, and actionable. Only Network Security Platform combines network and system security infrastructure for proactive enterprise-wide protection. It's exponentially more accurate and efficient than traditional point products. Manage risk and meet compliance—with less effort. Our intelligent security and reliable network-class platforms give you absolute confidence in your security.

KEY ADVANTAGES

Enterprise-wide coverage
- **A single industry-proven device provides comprehensive, proactive network and system security**

McAfee SRM integration
- **Integrates with McAfee Manager Vulnerability and ePO to give you on-demand visibility to critical host details and threat and risk relevance**

Fast, accurate decisions
- **Improve time-to-protection and time-to-confidence with real-time security that's not just automated, but actionable**

Reliable, network-class platforms; next-generation network protection
- **Performance from 100 Mbps to 10 Gbps**
- **Highest port density**
- **IPv6 protection**

Operational efficiency
- **Collaboration between McAfee network, system, risk, and management products saves time and IT resources**

Reliable Protection for Every Networked Device

How intelligent is your network security? Traditional intrusion prevention systems (IPS) are point solutions fraught with false positives and overwhelming alert logs. Their lack of coordination means valuable hours are lost to redundant management processes. Many PC-based solutions don't scale under attack, and few offer the control to mitigate patch pressures.

That's why more than 4,500 of the most demanding enterprises and service providers have selected McAfee Network Security Platform to protect their networks and network-connected devices.

Integrated Network and System Security

McAfee Network Security Platform is the perfect fit for enterprises that need real-time security confidence, with multi-gigabit performance and integrated, enterprise-wide network and system security. Network Security Platform's knowledge-driven security empowers you to automatically manage risk and meet compliance—while enhancing operational efficiency and reducing IT effort.

Using the McAfee security risk management (SRM) framework, Network Security Platform collaborates with McAfee Vulnerability Manager (*formerly McAfee Foundstone*®) McAfee ePolicy Orchestrator® (ePO™), and McAfee Network Access Control (MNAC) to give you more of the things that matter to your business—protection, visibility, efficiency, and value.

Absolute Security Confidence

Network Security Platform protects all network-connected devices with a combination of IPS and internal firewall that overlaps and integrates protection and extends firewall defenses to the internal network. We correlate signatures, anomalies, and denial of service (DoS) and distributed denial of service (DDoS) information to accurately block attacks before they reach their intended targets. Dynamic threat and vulnerability updates ensure continuous protection.

Network-class Platform with Multi-gigabit Performance

The Network Security Platform portfolio of purpose-built appliances delivers cost-effective, high-performance reliability for locations from branch offices to the network core. Network Security Platform is simple to set up and easy to use. Systems can be set up in a matter of minutes and efficiently managed and updated through a centralized, browser-based console.

NETWORK SECURITY PLATFORM

Real-time business protection

- Prevent attacks while reducing costs and downtime
- Protect your data and infrastructure
- Meet compliance initiatives

Protect your systems

- Proactive protection for unpatched systems
- Proactive protection for zero-day attacks
- System-aware IPS with McAfee ePO integration
- Host IPS/virus/spyware event visibility

Protect your network

- Next-generation 10 Gigabit Ethernet
- IPv6 protection
- Adaptive rate limiting
- Comprehensive infrastructure protection

Regulatory and policy compliance

- Real-time vulnerability awareness and compliance reporting
- Risk-aware IPS with Foundstone integration
- Behavior-driven host quarantine
- Enforce internal and regulatory policy

Network Security Platform's enviable quality and performance exceed carrier-class standards and make it the only IPS to hold the NSS Group's Multi-Gigabit IPS certification. And you get carrier-class reliability with the M-Series, offering up 10 Gbps performance with the highest port density on the market.

Mitigate Patch Anxieties and Enforce Your Policies

You are in control. With Network Security Platform, you insulate systems from risk while you validate and deploy patches. You can control traffic and apply unique policies and protections to a network segment, a collection of hosts, or even a single system. It's flexible, too, so that you can deploy patches when you are ready and set up policy enforcement to meet your organization's needs.

One Industry-proven Security Device

Surround your enterprise with proven McAfee security, backed by 24/7 research at McAfee Avert® Labs. Scale up your protections to carrier-class performance with one integrated network security solution.

Accurate, Enterprise-wide Threat Prevention

- Protect your enterprise from known, zero-day, DoS, DDoS, SYN flood, and encrypted attacks, and threats like spyware, Voice over IP (VoIP) vulnerabilities, botnets, malware, worms, Trojans, phishing, and peer-to-peer tunneling
- Improve accuracy through use of multiple advanced detection methods, including signature, application, and protocol anomaly; shell-code detection algorithms; and next-generation DoS and DDoS prevention
- Parse over 100 protocols and review over 3,000 high-quality, multi-token, multi-trigger signatures with stateful traffic inspection
- Get proactive blocking for hundreds of attacks straight out of the box with pre-configured *Recommended for Blocking* policies
- Receive continuous threat updates 24/7 from the global research team at McAfee Avert Labs

McAfee ePolicy Orchestrator (ePO) Integration

- Get real-time visibility of actionable system host details, including host name, user name, OS, patch level, MAC address, last scan date, protection details, and the top host IPS, anti-virus, and anti-spyware events
- Synthesize and filter data from multiple tools to create custom reports

Real-time Risk-aware Network Security Platform

- Integration with McAfee Foundstone provides auto-import of multiple vulnerability data points and regular or on-demand scans to accurately determine threat relevance

Adaptive Rate Limiting

- Network Security Platform uses real-time, protocol-based rate limiting to apply application, protocol type, and port-based bandwidth controls and improve quality of service
- Prioritize business-critical traffic and block unwanted and risky applications

Certification by NSS Group

- Network Security Platform is the only network IPS solution that has received the NSS Group's Multi-Gigabit IPS certification

Proven Manageability and Availability

Simple, centralized, web-based management of Network Security Platform appliances and policies includes:

- Fourteen ready-to-use, predefined IPS security policies
- Integrated user authentication support to external databases, including Radius, LDAP, and TACACS
- McAfee Network Security Manager (formerly McAfee IntruShield Security Manager) offers always-on management, automated failover and fail-back, and disaster recovery of critical configuration data
- Network Security Manager software is provided at no cost for managing up to two Network Security Platform appliances
- Network Security Central Manager *(formerly McAfee IntruShield Command Center)* provides hierarchical management for centralized control of policy viewing, modification, and distribution to support large, geographically dispersed sensor deployments
- High-availability configuration allows transparent, Layer 7, stateful failover, avoiding a single point of failure

Network Security Platform Specifications

Sensor Hardware Components	M-8000	M-6050	I-4010	I-4000	I-3000	I-2700	I-1400	I-1200
Network location	Core	Core	Core	Core	Core	Perimeter	Branch office/ perimeter	Branch office
Performance throughput	Up to 10 Gbps	Up to 5 Gbps	Up to 2 Gbps	Up to 2 Gbps	Up to 1 Gbps	Up to 600 Mbps	Up to 200 Mbps	Up to 100 Mbps
Maximum concurrent connections	4,000,000	2,000,000	1,000,000	1,000,000	500,000	250,000	80,000	40,000
Ports								
Gigabit Ethernet detection ports	16	8	12	4	12	2	—	—
10 Gigabit Ethernet	12	8	—	—	—	—	—	—
Fast Ethernet (FE) detection ports	—	—	—	—	—	6	4	2
Dedicated Fast Ethernet (FE) response ports	1	1	2	2	2	3	1	1
Dedicated Fast Ethernet (FE) management ports	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
External fail-open control ports	14	8	6	2	6	1	—	—
Console and aux ports	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Built-in network taps	No	No	No	No	No	Yes (for FE ports)	Yes	Yes
Fail-open	Optional	Optional	Optional	Optional	Optional	Yes (for FE ports)	Yes	Yes
Fail-close	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Mode of operation								
Span port monitoring	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Tap mode	Optional	Optional	Optional	Optional	Optional	Yes (for FE ports)	Yes	Yes
In-line mode	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Port clustering	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
No. of virtual IPS systems	1,000	1,000	1,000	1,000	1,000	100	32	16
Traffic monitoring on active-active links	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Traffic monitoring on active-passive links	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Monitoring of asymmetric traffic routing	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
High availability								
Redundant power	Yes (optional)	Yes (optional)	Yes (Optional)	Yes (Optional)	Yes (Optional)	Yes (Optional)	No	No
Device failure detection	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Link failure detection	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Physical								
Dimensions	2x 2RU Rack mountable 16.75 (W) x 3.05 (H) x 30.00 (D) each	2RU Rack mountable 16.75 (W) x 3.05 (H) x 30.00 (D)	2RU Rack mountable 17.44 (W) x 3.44 (H) x 23.00 (D)	2RU Rack mountable 17.44 (W) x 3.44 (H) x 23.00 (D)	2RU Rack mountable 17.44 (W) x 3.44 (H) x 23.00 (D)	2RU Rack mountable 17.44 (W) x 3.44 (H) x 23.00 (D)	1RU Rack mountable 17.32 (W) x 1.65 (H) x10.5 (D)	1RU Rack mountable 17.32 (W) x 1.65 (H) x10.5 (D)
Weight	94 lbs. (2x47)	47 lbs.	47 lbs.	47 lbs.	47 lbs.	47 lbs.	17 lbs.	15 lbs.
Power	100–240VAC (50/60Hz)							
Power consumption	2x450w	450w	350w	350w	350w	250w	100w	100w
Temperature	0° to 35° C (operating) -40° to 70° C (non-operating)		0° to 40° C (operating) -40° to 70° C (non-operating)					
Relative humidity (non-condensing)	Operational: 10 percent to 90 percent Non-operational: 5 percent to 95 percent							
Altitude	0 to 10,000 feet							
Safety certification	UL 1950, CSA-C22.2 No. 950, EN-60950, IEC 950, EN 60825, IEC 60825, 21CFR1040 CB license and report covering all national country deviations.							
EMI certification	FCC Part 15, Class A (CFR 47) (USA) ICES-003 Class A (Canada), EN55022 Class A (Europe), CISPR22 Class A (Int'l)
