

The Opportunity to Improve Your ROI has Never Been Greater

For a limited time save 15% - 25% on Licensing and Software agreements for Unified communications and collaboration server products.

With Microsoft Unified Communications (UC) Solutions you can reduce travel costs by up-to 40% and cut telephony, voicemail and audio conferencing costs by 10% - 40% with Microsoft's UC software and services platform. This platform enables streamlined communications from Microsoft Office applications across email, instant messaging, voice, data, video and web conferencing with security and reliability allowing:

- People to find and collaborate with co-workers quickly and easily
- Communications from almost anywhere and on a wide range of devices
- Presence awareness within desktop and line-of-business applications
- Enterprise grade security, reliability and availability in a trustworthy platform

Forrester constructed a Total Economic Impact study for a organization based on interviews from 15 Microsoft UC customers and found that the 3-year risk-adjusted ROI analysis for the composite company was 563%. Download the Forrester PDF document to find out more.
