

Helping you plan and deploy Microsoft solutions

Softchoice delivers Microsoft solutions from the desktop to the cloud that are focused on reducing costs and improving productivity. So whether it's optimizing your datacenter, migrating to Windows 7 or evaluating the cloud, we help you tackle your highest priority projects – and get you the results you need to be successful.

Serving your needs, start to finish

Our Microsoft services help customers take four of the most common Microsoft opportunities from conception to reality – all while applying our software asset management expertise to keep risks and costs low.

Our Experience & Resources:

Our Microsoft practice includes over 60 experienced Microsoft Certified Professionals strategically located across North America. They ensure every element of your Microsoft implementation is painless and will drive strategic value to your core business.
