

### SMALL BUSINESS SOLUTIONS

## Business challenge

Organizations of all sizes need to protect against viruses, spyware, and hackers, as well as threats to productivity such as spam, adware, and other potentially unwanted applications (PUAs). However, businesses with limited resources often do not have the time or skills required to protect their computers against the latest complex threats. Simply adding products to combat new threats increases complexity and cost.

### All-in-one threat defense

Sophos Security Suite eliminates multiple threats with a single anti-virus, anti-spyware, anti-adware, and anti-spam solution, as well as a client firewall. Centrally managed from the Sophos Control Center™, it protects both Windows® and Macintosh® desktop computers, laptops, and file servers, as well as Microsoft Exchange email servers and mail stores.

### Centralized cleanup and firewall

Sophos Anti-Virus® protects against and cleans up known and unknown threats, including spyware and threats to productivity, such as adware and potentially unwanted applications (PUAs\*). Integrated Behavioral Genotype® Protection identifies suspicious code and blocks it before execution, giving the benefits of a Host Intrusion Prevention System (HIPS). Sophos Client Firewall™ proactively locks down computers, safeguarding against internet worms, hackers, and the risk of unprotected computers connecting to and infecting a network.

### Comprehensive email security

Sophos PureMessage® stops spam, phishing attacks, and malware by scanning all inbound, outbound and internal email messages, and Exchange message stores. Threat reduction technology and policy enforcement blocks emerging threats and offensive content within the email body and attachments.

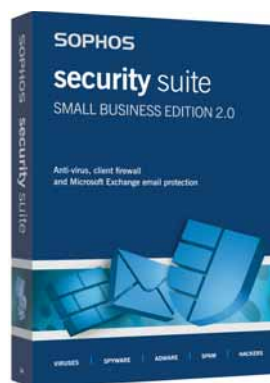

\* PUAs are applications that, while not malicious, are generally considered to be unsuitable for the majority of business networks. Examples are adware, dialers, remote administration tools and hacking tools.

### Easy to set up and use

Streamlined installation enables non-technical users to deploy the anti-virus and client firewall across the network from a central location in a matter of minutes. Sophos Control Center gives an instant overview of the status of every Windows and Mac computer, summarizing threats at a glance, and simplifying key tasks with its easy-to-read dashboard.

### Inclusive 24/7 support

Peace of mind is assured with expert help available whenever you need it, because Sophos small business solutions come with award-winning 24/7 telephone, email, and online support, 365 days a year as standard for the duration of the license.

*Sophos Security Suite: multiple threat protection in a single product*

## Key benefits

- » Protects Windows and Mac desktops, laptops, file servers, and Exchange email servers.
- » Allows non-technical users to protect their business quickly and easily.
- » Simplifies installation, management and configuration of anti-virus, anti-spyware, anti-spam, and desktop firewall with Sophos Control Center.
- » Detects and cleans up viruses, spyware, adware, and potentially unwanted applications centrally.
- » Prevents intrusion and hides desktops and remote computers from hackers.
- » Blocks new and targeted threats before they cause damage, with Behavioral Genotype Protection.
- » Scans all inbound, outbound, and internal email messages to block malware, spam, offensive content, and phishing attacks.
- » Updates automatically with the latest protection, direct from Sophos, using Sophos AutoUpdate™.
- » Protects proactively against families of malware and spam campaigns, with Genotype technology.
- » Safeguards productivity with fast scanning engine and low impact on network and system resources.
- » Includes unlimited 24-hour telephone, email, and online support, 365 days a year.

# SOPHOS security suite

SMALL BUSINESS EDITION 2.0

## SMALL BUSINESS SOLUTIONS

### Technical details

#### Function

- Protects Windows and Macintosh desktops, laptops, and file servers from malware and adware, and prevents intrusion on Windows desktops and laptops.
- Protects Microsoft Exchange email servers from spam, malware, and offensive content.

#### Central management

- Sophos Control Center manages all endpoints, integrating with PureMessage Console to manage virus scanning and spam filtering policies for email servers.

#### Automatic updating

- Rapid threat analysis from SophosLabs, together with Sophos AutoUpdate, ensures that all computers, including remote laptops, are protected at all times.

#### Proactive protection

- Genotype technology proactively protects customers from new emerging threats and spam before specific protection is released.
- Decision Caching™ technology enhances the performance of on-access scanning by ensuring that only files that have changed are scanned.
- Behavioral Genotype Protection blocks suspicious code before it executes: unlike runtime solutions, Sophos behavioral rulesets are constantly validated against an extensive library of legitimate applications, minimizing the risk of false positives.

#### Intrusion prevention

- Sophos's stealth technology shields computers against hackers using port scanning to probe for a weak point in the network.

#### Port tracking

- Sophos Client Firewall technology stops known and unknown threats by tracking active ports and closing all inactive ports.
- Ensures that internet worms are blocked before they can exploit operating system vulnerabilities.

#### Application-level filtering

- Allows internet access only to authorized applications.
- Prevents spyware from stealing data or performing other malicious acts.

#### Languages supported

English, French, German, Italian, Japanese, Spanish, Simplified and Traditional Chinese.  
(Email security: English and Japanese).

### System requirements

#### Windows and Macintosh desktops

- » Windows 98 SE/Me:  
90 MB free disk space  
Minimum RAM 48 MB  
Recommended RAM 64 MB
- » Windows 2000/2003/Vista,  
Windows XP Home and Pro:  
90 MB free disk space  
Minimum RAM 128 MB  
Recommended RAM 256 MB
- » Mac OS X 10.2 and higher:  
70 MB free disk space  
Minimum RAM 128 MB

#### Server computer (including Sophos Control Center)

- » Windows 2000/2003/XP Pro,  
Small Business Server 2003:  
1 GB free disk space  
Minimum RAM 256 MB

#### Email server

- » Exchange 2000/2003:  
140 MB free disk space  
Minimum RAM 256 MB
- » Windows 2000/2003/XP Pro:  
140 MB free disk space  
Minimum RAM 256 MB

#### Note:

Adware and PUA detection is available on Windows 2000/2003/XP Home and Pro  
Sophos Client Firewall can be run on Windows 2000 Pro/XP Home and Pro

#### Other small business editions:

Sophos Computer Security SBE (Desktop anti-virus and client firewall only)

Sophos Anti-Virus SBE (Desktop anti-virus only)

Sophos is a world leader in integrated threat management solutions purpose-built for business, education and government. With 20 years' experience and consolidated anti-virus, anti-spyware and anti-spam expertise SophosLabs protects even the most complex networks from known and unknown threats. Our reliably engineered, easy-to-operate products protect over 35 million users in more than 150 countries from viruses, spyware, intrusions, unwanted applications, phishing, spam and email policy abuse. Round-the-clock vigilance has resulted in our increasingly rapid international growth, expanding user base and continuous profitability. Our instant response to new threats is matched by business-focused, 24/7 technical support, and has led to the highest levels of customer satisfaction in the industry.
