TREND MICRO™

Securing Your Web World

Trend Micro™

Enterprise Security Suite

Maximum protection and minimum complexity from gateway to endpoint

Securing enterprise environments is challenging—especially as new malware emerges every 2 seconds. With a sharp increase in the cost and complexity of managing a variety of security solutions across diverse networks, you need fully integrated gateway-to-endpoint security that delivers maximum protection with minimum complexity.

Reduce Risk with Fully Integrated, Gateway-to-Endpoint Security Suite

Sophisticated malware exploits multiple points of entry—and the only effective response is a layered defense. Trend Micro Enterprise Security Suite consolidates malware protection from gateway to endpoint in one centrally managed solution suite to stop threats before they can impact your business.

• Reduces endpoint infection rates by 62%[1] with a multilayered defense
• Improves productivity with #1 rated antispam and web filtering[2]
• Supports regulatory compliance with content filtering and anti-malware

Maximize Protection with Industry-leading Threat Intelligence

Complex threats are striking faster and with more force than ever before. Trend Micro offers the industry's best malware protection powered by the Trend Micro™ Smart Protection Network™—proven by independent testing[3] to stop more threats in real-world computing environments.

• Delivers immediate protection with in-the-cloud web, email and file reputation technology
• Stops the latest threats before they can enter your network and damage your business

Minimize Complexity with Security Designed for the Enterprise Environment

Maintaining consistent security across distributed, diverse network environments is challenging. Trend Micro Enterprise Security Suite scales to meet your organization's needs by offering virtualization support, multi-tiered management, and flexible configuration options.

• Offers broad platform support for heterogeneous environments to minimize complexity
• Tightly integrates with industry-leading offerings from Microsoft, Cisco, and IBM Lotus

Save Money with Cost-effective Security

Now more than ever, you need to cut costs and a large portion of your costs are related to IT staff time devoted to acquiring, deploying, and managing content security. Trend Micro Enterprise Security Suite saves you money by saving you time with consolidated protection. Independent research shows that consolidating on Trend Micro Enterprise Security can lower security management cost by 40%.[4]

• Saves on routine clean-up costs by dramatically lowering endpoint infection rate and automating malware and spyware cleanup
• Reduces reliance on conventional antivirus signatures, relieving administrative burden
• Maximizes efficiency with web-based centralized management and reporting

SOFTWARE & SERVICES

Protection Points
• Gateway
• Mail servers
• File servers
• Clients
• Mobile Devices

Threat Protection
• Viruses and Trojans
• Network vulnerabilities
• Spyware, rootkits, and bots
• Web threats
• Spam and phishing
• Inappropriate content

KEY BENEFITS

• Reduces risk with comprehensive multilayered, multi-threat protection

• Delivers immediate protection with in-the-cloud threat intelligence

• Lowers endpoint infection rates by 62%

• Slashes IT security management costs by 40%

• Offers enterprise-class scalability, configurability, and platform support

• Improves productivity with #1 rated spam blocking and web filtering

Maximum Protection and Minimum Complexity across Protections Points and Platforms

Multilayered Protection	Platform Coverage	Advantage
GATEWAY		
InterScan Messaging Security Virtual Appliance	VMware	Virtualized email gateway security stops spam and email threats
InterScan Web Security Virtual Appliance	VMware	Virtualized web gateway security blocks web threats and includes URL filtering
MAIL SERVER		
ScanMail™ Suite for Microsoft® Exchange	Windows	Blocking spam, malware and spyware at the mail server
ScanMail™ Suite for Lotus™ Domino™	Windows, Linux	Blocking spam, malware and spyware at the mail server
FILE SERVER		
OfficeScan™	Windows	Secures Windows servers
ServerProtect™ for Windows®/ Novell NetWare	Windows, NetWare	Secures Windows and NetWare file servers
ServerProtect™ for Linux™	Linux	Secures Linux files servers
CLIENT/MOBILE DEVICE		
OfficeScan™	Windows	Secures Windows servers
• Intrusion Defense Firewall	Windows	Proactive HIPS and vulnerability shielding
• Mobile Security (Standard)	Windows Mobile, Symbian	Safeguards data and applications on smartphones and PDAs
• Security for Mac	Apple Macintosh	Protects MacIntosh clients from malware and blocks malicious websites
MANAGEMENT		
Control Manager Advanced	Windows	Centrally manages security

TREND MICRO ENTERPRISE SECURITY SUITE ADD-ON OPTIONS
Expand your protection with the following add-on security modules—for security tailored to the needs of your environment.

Target Protection	Add-On Security	Advantage
Endpoint Data	• Data Loss Prevention for Endpoint	• Data loss prevention
Datacenter	• Deep Security	• Server security for physical, virtual, and cloud computing environments
Storage	• ServerProtect for NetApp • ServerProtect for EMC	• Secures storage servers • Secures storage servers
Messaging	• Email Encryption Gateway • Email Encryption Client • IM Security	• Identity-based encryption at the gateway • Identity-based encryption at the endpoint • Stops threats from propagating through instant messaging systems
Web	• Advanced Reporting and Management	• Real-time reporting on Internet use
Collaboration	• PortalProtect	• Protects SharePoint collaboration systems
Network Security Overwatch	• Threat Management Services	• Discovery and remediation of active infections that have bypassed the security infrastructure
Support Services	• Premium Support	• Personalized, proactive support

Minimum System Requirements

For the latest Trend Micro Enterprise Security Suite system requirements please refer to the Enterprise Security Suite product page at:
