Securing Your Web World

Trend Micro™

Worry-Free™ Business Security Advanced and Standard

#1 for Small Business Security

Trend Micro™ Worry-Free™ Business Security Advanced and Standard software protect your computers, laptops and servers from viruses, spyware, spam and other web threats. They also prevent infections from USB devices, secure Wi-Fi connections, and include URL filtering to block access to risky web sites. The Advanced version includes hosted email security for extra spam protection.

Global smart threat detection

Trend Micro Worry-Free Business Security solutions give you a safer, smarter, and simpler way to protect your business. Unlike other antivirus and antispam solutions, Worry-Free Business Security solutions are powered by the Trend Micro™ Smart Protection Network. This proactive approach to security uses global threat sensors to identify and blocks viruses, spyware, spam, and web threats before they reach your business. It's a lot like having a global neighborhood watch to protect your business.

Protection for any business

While businesses vary in shape and size, Trend Micro offers protection from viruses, spyware and other web threats for literally every company environment. For example, if you have computers but no server—we offer hosted security with Worry-Free Business Security Services. Or, if you also have Windows file servers—we offer Worry-Free Business Security Standard. The Advanced edition includes antispam and protects email servers.

Experience Worry-Free Security

Safer
• Stops viruses, spyware, spam, and other web threats before they reach your business with Trend Micro Smart Protection Network.
• Stops new threats faster by automatically sending information about possible threats from protected computers to Trend Micro using Smart Feedback.
• Blocks infected, time-wasting, or offensive websites with URL filtering.

Smarter
• Fast scanning and updates with Smart Scan maximizes protection against new threats.
• Minimizes performance impact to PCs by storing update information centrally.

Simpler
• Specifically built for small business so it's easy to install and deploy.
• Check protection at-a-glance via a dashboard with "traffic-light" status.

WORRY FREE SECURITY

Five Star Review
from BrightHub

"Worry-Free Business Security is easy to deploy and manage and offers industry-leading protection against a broad range of threats. In short, Trend Micro Worry-Free Business Security Advanced 6.0 puts enterprise-class IT security easily within the reach of smaller businesses. Highly recommended!"

" We are seeing a lot more Web threats today, and we appreciate that Trend Micro does a great job in keeping up with the changing nature of attacks... We've seen Trend Micro respond in less than an hour when it takes several hours for Symantec. "

Jim Sterling, President

High performance, zero administration

Worry-Free Business Security continuously updates your protection, and stores the majority of the security technologies on the local security server—not on your employee's computers. This means fast scanning to stop the latest threats without significantly impacting the performance of your computers.

FEATURES AND BENEFITS	
Key Features	**Benefits**
Fast Scanning	
Smart Scan detects and removes the latest threats by significantly increasing frequency of updates.	• Helps users stay productive • Minimizes impact to users' PCs over time
URL Filtering	
Block inappropriate websites with configurable filter strength, rules, and business/leisure hours.	• Provides additional protection against web threats by blocking exposure to risky websites • Helps keep employees focused by blocking offensive or non-work related websites
Smart Feedback Technology	
Simply and automatically feed back security-related issues/events to Trend Micro.	• Identifies new threats faster to protect users rapidly • Speeds identification, analysis, and resolution of new threats to protect all users
