PC Magazine

Websense Express helps improve employee productivity and protects organizations from Web-based threats.

websense[®]
ESSENTIAL INFORMATION PROTECTION™

Websense Express

Unmanaged Internet access presents many challenges to organizations that rely on the Web for day-to-day business. Even seemingly harmless Internet use opens the door to productivity loss and threat exposure. While large organizations may have access to expensive, sophisticated security solutions, smaller organizations may not have the budgets or staffing required to protect against these threats.

Websense[®] Express delivers the industry’s most respected content filtering and Internet security solution optimized for mid-sized and smaller organizations. Simple and affordable, it protects against the dangers of unmanaged Internet access.

How Is Websense Express Different?

Websense Express is engineered to meet the needs of small to mid-sized organizations who require a content filtering and Web security solution that works out-of-the-box, requires no specialized training, and delivers real value quickly.

Websense Express delivers enterprise-level functionality, optimized for the needs of mid-sized and smaller organizations.

Simple

- Combines content filtering and Web security into one solution that improves employee productivity and protects against complex Internet threats.
- Fully-integrated system platform provides one-box management and reporting in a single server.
- Intuitive real-time monitoring shows Internet usage and system status on one dashboard screen.

Affordable

- Begins working immediately, often paying for itself within 30 days with productivity improvements alone.
- Eliminates layers of IT security technology that are ill-designed to address the productivity

and Web security needs of mid-sized and smaller organizations.

- Reduces added expenditures by leveraging your existing Windows[®] investment and expertise.

Fast

- Provides immediate protection against productivity and bandwidth draining Internet use and Web-based threats.
- Easy installation and out-of-box defaults mean the software is set-up within 30 minutes.
- “Getting Started” tutorial helps administrators create customized policies quickly

Easy

- Always up-to-date through automatic daily database updates; requires little maintenance or updating.
- Web-based reporting and context-sensitive drill down capabilities for easy and effective analysis of employee Internet use.
- Integrates with Active Directory and NT domains for easy policy creation and organizational reporting.

Beyond Simple, Affordable, Fast, and Easy

Websense Express enables mid-sized and smaller organizations to efficiently and effectively protect their users from productivity and Internet security risks by proactively blocking access to inappropriate content and security threats before they have a chance to infect their systems. Websense Express helps organizations create a safe computing environment, enabling employees to productively use the Internet without exposure to risks which are typically missed or too costly to prevent using traditional security technologies such as antivirus and intrusion prevention systems.

Benefits

Delivers “Instant Value”

- Within minutes of installation, management has visibility into how the organization is performing, the level of Internet activity, and where risks exist—such as security threats and bandwidth usage.

Optimizes User Productivity and IT Resources

- Ensures employees work in an environment that is conducive for business.
- Increases employee productivity and reduces IT staff diversions by proactively managing Internet use and its associated risks.

System Requirements

- Microsoft® Windows Server® 2003 (SP1-R2)
- Intel Dual-Core Xeon
- 2 GB RAM
- 160 GB HDD
- Available as software (worldwide) or an appliance (North America only). Consult your Websense reseller for details.

Summary

Websense Express provides industry-leading content filtering and Internet security capabilities to organizations with under 1000 users. Affordable and easy to use, Websense Express protects businesses from Internet risks by controlling access to inappropriate content and proactively blocking security threats.

Features

Real-time URL and Protocol Monitors

- Builds easy-to-understand charts and graphs in real-time, right in the management console so problems can be seen immediately.

Integrated System Platform

- Provides a single server solution that supports centralized management and analysis of Internet use.
- Through a single-pass installation, all the necessary third-party software components are provided and configured to work with no additional effort.

Industry-leading Web Filtering Capabilities

- Includes the industry's leading Web filtering technology, the most comprehensive and accurate on the market, allowing organizations to manage productivity, reduce their risk of legal liability, and improve bandwidth use.

Proactive Protection from Internet Threats

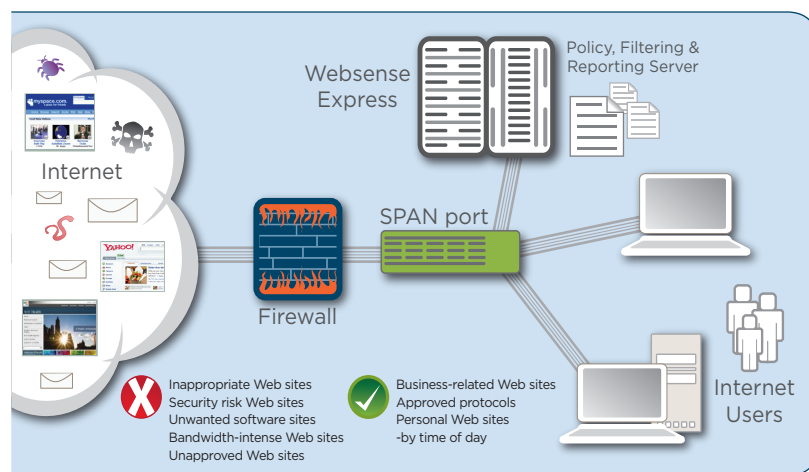

- Identifies security threats, such as malicious Web sites, protocols, applications, and HTTP traffic—including spyware, drive-by spyware, bots, malware, phishing, pharming, and keylogging—and blocks this traffic before it enters the network.

Protocol and Bandwidth Management

- Enables organizations to manage popular protocols including Instant Messaging, Peer-to-Peer, and other security-related protocols, to optimize network bandwidth and prevent the misuse of communication channels.

Powered by Websense ThreatSeeker Network

Websense ThreatSeeker™ Network delivers preemptive protection from Web-based security threats. Websense ThreatSeeker Technology uses more than 100 proprietary processes and systems to decipher emerging and complex threats and uses a combination of mathematical algorithms, behavior profiling, code analysis, as well as an extensive network of data mining machines. The foundation of all Websense security software products, Websense ThreatSeeker Network provides ongoing threat intelligence and delivers automatic protection to customers.
