Softchoice Virtualization **TechCheck**

Understanding What's In Your Virtual Environment

The **Softchoice Virtualization TechCheck** is designed to arm clients with a fact-based portrait of the current environment, and in turn, helps map out next steps through intelligence that informs cost savings, performance improvements and capacity planning.

Discovery

• Using an agent-less data collection tool, we will gather information about your existing infrastructure.

Analysis

• Softchoice technical experts evaluate findings and consolidate the broad data to estimate storage requirements based on a snapshot of the server workload usage

• Set actionable insights that are validated with a client findings and recommendations session

Virtualization Workshop and Analysis Report

• Review business demands and current issues

• Overview of risks and remediation through guided data review and recommendations

• Structured review of the Virtualization TechCheck and evaluate options with a Softchoice virtualization subject matter expert

Who should be involved?

Softchoice recommends clients assemble a cross functional IT team with a senior IT leader sponsor that provides alignment to the issues, business drivers and guides prioritization.

Discover what's in your virtual environment by contacting your Softchoice Account Manager or TechCheck@Softchoice.com to set up A Virtualization TechCheck today.
