

ESET TECHNOLOGY ALLIANCE

Bringing you the world's best security solutions

Data Loss Prevention

Safetica

Comprehensive solution that prevents expensive data leaks.

- Covers all data leak channels.
- Helps identify changes in productivity and reveal dangerous trends.
- Prevents social engineering attacks and blackmail attempts.
- Identifies suspicious activities before they result in lost time and money.

Backup & Recovery

Xopero

Safeguards your data with reliable backup and recovery, no matter where your data is stored.

- Delivers comprehensive protection for everything from a single laptop or smartphone through servers, databases, mailboxes and virtual machines.
- Allows you to easily and effectively create backups, synchronize and restore data from servers and workstations.
- Allows fast recovery of the entire system environment—not only data, but system settings as well, on the old or new server.
- AES 256 encryption guarantees that no one can access your data. Backup files are protected in transit and after they're stored.

Network Traffic Analysis

GREYCORTEX MENDEL

Helps enterprise, government and other users secure their IT using advanced artificial intelligence, machine learning and big data analysis.

- Goes beyond known threats to detect and identify symptoms of malicious behavior at the atomic level.
- Identifies threats in their early stages, decreasing incident response time, preventing further damage and reducing overall risk.
- Monitors network flow data in IoT devices; able to identify traffic in and out of the network and communication flows between devices within the network.
- Collects several times more information on network traffic than NetFlow, IPFIX or similar protocols.

"With ESET Technology Alliance we are able to give our business customers comprehensive, proven solutions from companies that share the same values that we do."

PALO LUKA, CHIEF TECHNOLOGY OFFICER

About ESET: Since 1987, ESET® has been developing award-winning security software that now helps over 100 million users to Enjoy Safer Technology.
