

Elevate Your Security Operations with FireEye Helix

INTRODUCTION

Cyber security has never been more challenging. Almost daily, new threats expose companies' vulnerabilities, forcing them to purchase more products and hire more talent. Such reactive approaches lead to escalating complexity — yet another vulnerability attackers can take advantage of. Security operations — big or small — require a holistic, foundational approach. FireEye Helix helps organizations build that foundation.

FireEye Helix is a security operations platform that makes it simple to deliver advanced security to any organization. It surfaces unseen threats and empowers expert decisions with frontline intelligence to take back control of your defenses and capture the untapped potential of your security investments. Available with any FireEye solution, FireEye Helix works as a seamless and scalable foundation to connect and enhance all your security solutions, including non-FireEye products. Designed by security experts, for security experts, it empowers security teams to efficiently conduct primary functions, such as alert management, search, analysis, investigations and reporting.

BENEFITS

• Raise your visibility

Integrates over 300 FireEye and non-FireEye security tools and overlays nation-grade threat intelligence, rules, and analytics to deliver unparalleled situational awareness.

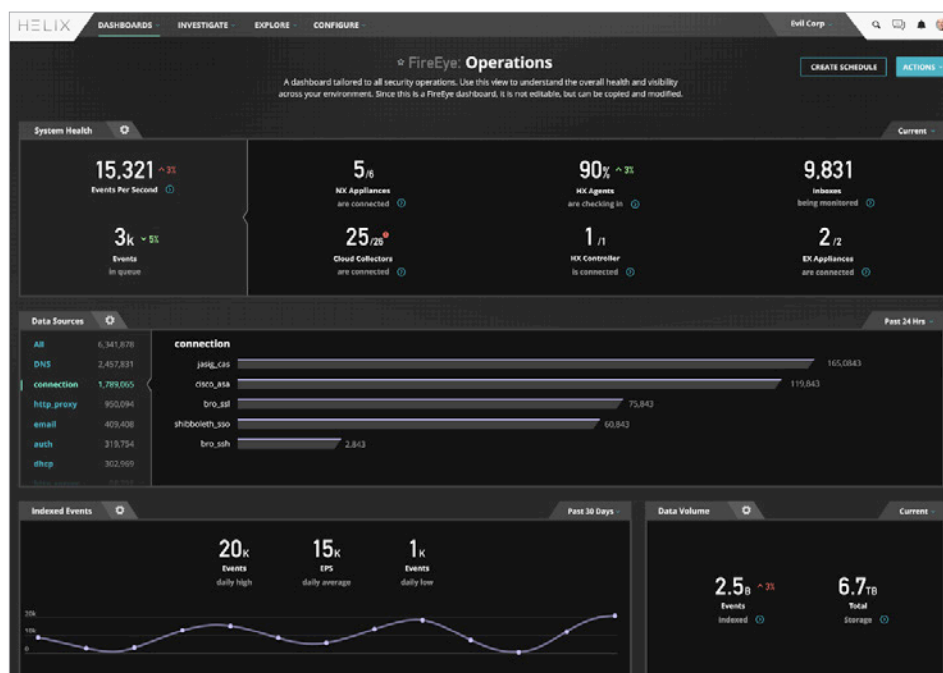

• Accelerate response and minimize the impact of a breach

Centralizes major security functions and automate workflows with pre-built playbooks informed by frontline experience.

• Reduce total cost of operations

Consolidates areas of existing spend including SIEM, threat intelligence and security orchestration.

Figure 1. Operational interface for immediate situational awareness.

WHAT IT DOES

Detect true enemies and understand their behavior

Make informed decisions with contextual threat intelligence

Enhance the efficacy of existing security investments

Figure 2. FireEye Helix features.

 <p>Analytics Discover hidden patterns and anomalies in your data to further enrich detection and provide context for the investigative process.</p>	 <p>APIs Support open and flexible APIs for integration into 3rd party products, and seamless embedding into customer environments.</p>	 <p>Context Automatically coalesce related data to help drive faster decisions, including context across intelligence, alerts, host and user data.</p>
 <p>Compliance Predefined or custom dashboards and widgets to visually aggregate, present and explore the most important information to a user while meeting compliance requirements.</p>	 <p>Detection Apply FireEye expert rules and FireEye iSIGHT Intelligence against existing data to identify threats that others miss.</p>	<p>How to Get the FireEye Helix Platform</p> <p>FireEye Helix is available with the purchase of FireEye solutions. It works across all FireEye technologies and integrates your installed base of third party security products. As your organization grows and changes, FireEye solutions can be reconfigured, added or upgraded without disrupting organizational operations.</p>
 <p>Device and Policy Management Manage configurations, policies and health status across your environment.</p>	 <p>Role Based Access Control Create role based groups and assign granular permissions to access the console.</p>	
 <p>Intelligence Detect, enrich, explore and learn about the latest intelligence threats from FireEye, with breakdowns by country and industry.</p>	 <p>Orchestration Automate and accelerate the investigative and response process via product integrations and defined actions for specific alerts.</p>	
 <p>Investigative workbench Full index, archive, search and malware analysts against alerts and event data from all sources across the infrastructure to support flexible pivoting and fast hunting.</p>	 <p>Workflow Management Organize, assign, collaborate and action steps through the investigative process through automated and manual workflows.</p>
