

Connected workflows for architecture with the AEC Collection

Realize the unique benefits of Autodesk's Architecture, Engineering and Construction Collection throughout the building design process.

Integrated, multidiscipline workflows for design, visualization and analysis set the AEC Collection apart from the very beginning.

Benefits

Everything you need

Get access to BIM and CAD technologies that provide end-to-end capabilities for design, engineering and construction.

The power of workflows

Use integrated workflows that allow you to work more efficiently, improve project team collaboration, and offer more value-added services to clients.

Prepare for the future

Stay competitive with the ability to customize your software according to current project needs, and adopt advanced design and construction technologies when you need them.

Capabilities

Using a connected BIM workflow, architects can more seamlessly conceive, model, optimize, and coordinate their designs with AEC professionals across disciplines and throughout the lifecycle of a project.

Sketching and Massing

Documentation

Computational and Generative Design

Reality Capture

Performance Analysis

Visualization

Virtual Reality

Multidiscipline Coordination

Extend BIM further with these top tools and more

Conceptual Design

FormIt Pro

Use an intuitive 3D sketching app with native Revit interoperability, and analysis and collaboration features.

Dynamo Studio

Design logic that drives the behavior of design model, and capture existing conditions and convert to data.

Schematic Design

ReCap Pro

Design in-context with reality-capture and 3D scanning software and services.

AutoCAD

Speed documentation, share ideas, and explore 3D concepts with powerful design and documentation tools.

Detailed Design

3ds Max

3D modeling, animation, and rendering software.

Insight

Optimize building performance with centralized access to performance data and advanced analysis engines.

Revit Live

Turn models into immersive visualizations.

Rendering

Move compute-intensive rendering to the cloud to create more photorealistic images and panoramas.

Documentation

Navisworks Manage

Integrate data from multiple sources to facilitate whole project review, coordination, and quantification.

25GB of Cloud Storage

For a complete list of all software and services in the Collection visit www.autodesk.com/collections/architecture-engineering-construction/included-software

Subscription benefits

More value, more flexibility, more simplicity

- Access to a wide selection of essential 3D design software
- Choose the individual products that you want to use
- Download and deploy the latest software updates
- Access previous versions when you need them

Smarter software management

- Flexible term lengths and access for individuals or teams
- Simplify and standardize on a collection
- Autodesk technical support
- Optimized budgeting
