CISCO DATA CENTER SOLUTIONS BY AXIOM

The OEM Alternative for Cisco UCS

AXIOM

Designed specifically for Cisco UCS application, Axiom offers data center solutions that are guaranteed compatible for your Cisco UCS environments. From Cisco Networking to UCS Memory to Cisco Servers and more, Axiom is the answer for cost effective OEM alternative solutions for Cisco UCS. With innovative and performance driven products that utilize only tier-one components and are completely tested in Cisco hardware, Axiom delivers reliability you can count on.
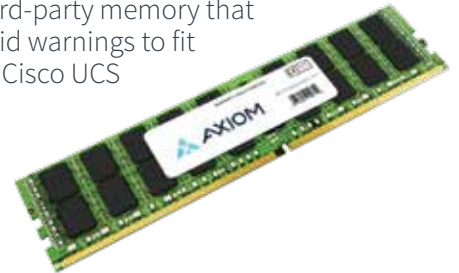

Transceivers and Networking Products

Designed for powerful Cisco Networking switches and server platforms across the data center, campus and small business segments to align network capacity to IT demand.

UCS Memory

Configured for seamless compatibility and the only third-party memory that eliminates invalid warnings to fit perfectly within Cisco UCS servers.

UCS Storage

Created to provide reliable storage options that efficiently expand and improve your resources.

Third-Party Maintenance with AMS

Tailored to support all Cisco post warranty, end-of-life and end-of-service life needs through robust third-party maintenance.
