ESET®

SECURITY MANAGEMENT CENTER

Enterprise-grade security management solution providing visibility, management and reporting across all OSes

CYBERSECURITY
EXPERTS ON YOUR SIDE

30 YEARS OF
CONTINUOUS
IT SECURITY
INNOVATION

ESET Security Management Center utilizes a web console to provide real-time visibility for on-premise and off-premise endpoints as well as full reporting and security management for all OSes.

It is a single pane of glass over all ESET security solutions deployed in the network and controls Endpoint Prevention, Detection & Response layers across all platforms – covering desktops, servers, agentless virtual machines and even managed mobile devices.

"Centrally managed security on all endpoints, servers and mobile devices was a key benefit for us."

— IT Manager; Diamantis Masoutis S.A., Greece; 6.000+ seats

The ESET difference

PREVENTION TO RESPONSE

ESET combines the management of our Endpoint products with our Endpoint Detection and Response solution, ESET Enterprise Inspector and our sophisticated online sandbox ESET Dynamic Threat Defense into a single easy-to-use management console.

SINGLE-CLICK INCIDENT REMEDIATIONS

From the threats tab, an IT admin can create an exclusion, submit files for further analysis or initiate a scan from a single click. Exclusions can be made by threat name, URL, hash or combination.

FULLY CUSTOMIZABLE NOTIFICATION SYSTEM

The notification system features a full "what you see is what you get" editor, where you will be able to fully configure notifications to be alerted on the exact information you want to be notified about.

DYNAMIC AND CUSTOM REPORTING

The ESET Security Management Center provides over 170 built-in reports and allows you to create custom reports from over 1000 data points. This allows organizations to create reports to look and feel exactly as they might want. Once created, reports can be set up to be generated and emailed at scheduled intervals.

AUTOMATION FRAMEWORK

Dynamic groups can sort computers based on current device status or defined inclusion criteria. Tasks can then be set up to trigger actions such as scans, policy changes or software installs/uninstalls based off dynamic group membership changes.

FULLY AUTOMATED VDI SUPPORT

A comprehensive hardware detection algorithm is used to determine the identity of the machine based on its hardware. This allows automated re-imaging and cloning of non-persistent hardware environments. Therefore, ESET's VDI support requires no manual interaction and is fully automated.

PROVEN AND TRUSTED

ESET has been in the security industry for over 30 years, and continue to evolve our technology to stay one step ahead of the newest threats. This has led us to be trusted by over 110 million users worldwide. Our technology is constantly scrutinized and validated by third-party testers who show how effective our approach is at stopping the latest threats.
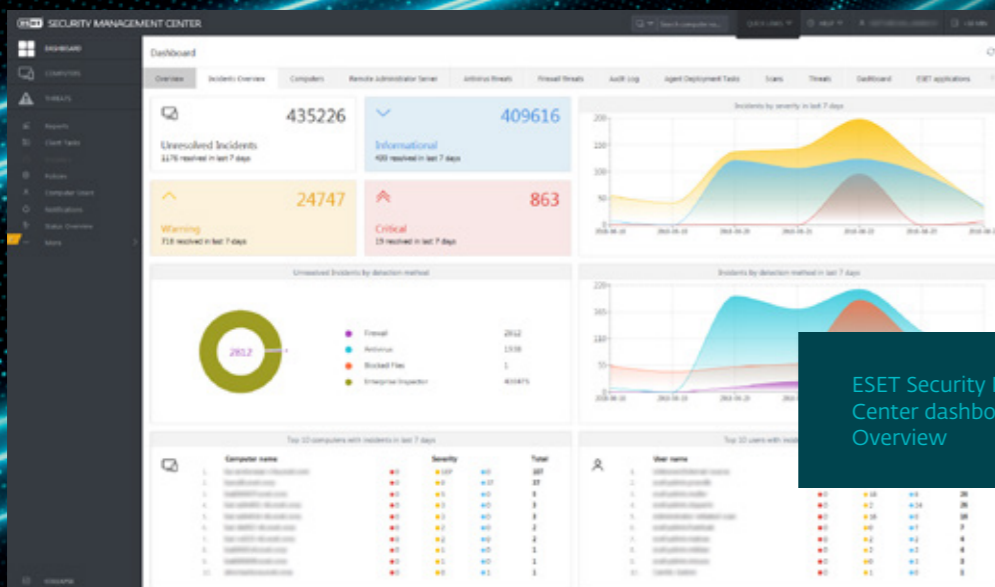

ESET Security Management Center dashboard - Incidents Overview

"Outstanding company, superb technical support, provides strong threat protection and central management."

— Dave, Manager of IT; Deer Valley Unified School District, USA; 15.500+ seats

Technical features

FLEXIBLE INSTALL

ESET Security Management Center can be installed on Windows, Linux or via Virtual Appliance. After install, all management is done via a web-console, allowing easy access and management from any device or operating system.

SINGLE PANE OF GLASS

All ESET Endpoint products despite the OS can be managed from a single ESET Security Management Center instance. In addition, ESET Security Management Center supports full Mobile Device Management (MDM) of Android and iOS devices.

COMPLETELY MULTI-TENANT

2FA secured logins and multiple users and permission groups can be created to allow access to a limited portion of the ESET Security Management Center instance. This allows full streamlining of responsibilities across large enterprise teams.

HARDWARE/SOFTWARE INVENTORY

Not only does ESET Security Management Center report on all installed software applications across an organization, it also reports on installed hardware. This allows you to do more from a single location by dynamically grouping computers based off make, model, OS, processor, RAM, HD space and many more items.

GRANULAR POLICY CONTROL

Organizations can set up multiple policies for the same computer or group and can nest policies for inherited permissions. In addition, organizations can configure policy settings as user-configurable, so you can lock down any number of settings from the end users.

SIEM SUPPORT

ESET Security Management Center fully supports SIEM tools and can output all log information in the widely accepted JSON or LEEF format.
