

Kaspersky® Small Office Security

CYBERSECURITY CREATED FOR SMALL BUSINESSES

Small businesses face many of the same cybersecurity threats as large enterprises, without the same resources to deal with them.

Kaspersky Small Office Security was designed for small businesses' security needs. Easy to install and manage, it also:

- ▶ Protects your business from online attacks and ransomware
- ▶ Provides award-winning security for your PCs, file servers and smartphones
- ▶ Safeguards your company from financial fraud and data loss

Choose **Kaspersky Small Office Security** to keep your small business safe.

KASPERSKY Lab

THE POWER
OF PROTECTION

STRONG PROTECTION FOR YOUR SMALL BUSINESS

Kaspersky Small Office Security offers small business owners the cybersecurity they need. It combines award-winning anti-malware with additional technologies specifically tailored for smaller businesses.

EASY TO USE — Kaspersky Small Office Security is easy to use and comes with extended functionality and control. Our web-based console lets you manage and monitor security from anywhere —this including outsourcing to an external specialist.

KEEP YOUR DEVICES SAFE — Protect Android smartphones and tablets with our mobile security and management technologies. Lock, wipe and locate missing devices. Use secure 'containers' to protect sensitive information on employee-owned devices and filter out spam, too.

38,000: cost of a small business security breach*

* Source: <http://usa.kaspersky.com/about-us/press-center/press-releases/2015/bottom-line-businesses-spend-half-million-dollars-recover-cyber>

SAFE MONEY — Prevent financial fraud and secure online banking for your business. Our award-winning Safe Money protects your online banking transactions. The virtual and secure keyboards prevent keyloggers from stealing your financial details.

SECURE WEB AND EMAIL ACTIVITY — Stop spyware, phishing and malicious internet links from hijacking your business. Secure email and web activity against hidden exploits and malware

PROTECT SENSITIVE DATA — Secure your company's sensitive data and protect your business from data breaches, fines and lost business with backup and encryption. Anti-cryptor capabilities stops CryptoLocker and ransomware in their tracks. Attempts at malicious encryption trigger automatic backup and restore.

PROTECT YOUR PASSWORDS— Securely generate, store and sync passwords for easy access from PC, Mac, Android and iOS devices.

OPTIMIZED SOFTWARE PERFORMANCE — An optimized software performance and PC resource consumption provides your company with a more efficient traffic flow, start-up time, a faster web loading time, optimized deployments and updates.

WORK MORE EFFICIENTLY — Kaspersky Small Office Security can control application activity on your network, in line with your firewall settings before it even launches.

MOST TESTED, MOST AWARDED SECURITY — Kaspersky Lab has participated in 94 independent tests throughout 2015, achieving first place in 60 of the tests. Our products also achieved a higher percentage of top-three placements than any other vendor – 82 percent!

PROTECTION ACROSS PLATFORMS — Kaspersky Small Office Security protects Windows PCs, laptops and servers; Mac laptops and desktops; and Android smartphones and tablets. Password management is available for Android and iOS devices.

Applications inside: Kaspersky Small Office Security 5 for PC, Kaspersky Small Office Security 5 for File Server, Kaspersky Internet Security 16 for Mac, Password manager, Kaspersky Internet Security for Android.
