

# The Journey to the Cloud

Helping IT professionals monitor, manage, and secure their assets hosted in Microsoft® Azure

## CHALLENGE

## HOW SOLARWINDS CAN HELP

## SOLARWINDS PRODUCTS

**Need for improved management and governance of hybrid and multi-cloud environments.**

51% of companies now think of their cloud providers as a portfolio that needs to be managed as a whole rather than as individual parts.

*(Source: IDG 2018 Cloud Computing Survey)*

SolarWinds IT Operations Management solutions helps IT pros like you centrally monitor, manage and secure your applications and infrastructure across your modern, hybrid, and multi-cloud environments.

**Lack of insight into health and performance of resources in public clouds.**

35% of IT pros report their vendors have done a poor job of adding cloud-monitoring support to their tools, and 28% report their vendors have no roadmap for such capabilities.

*(Source: "Survey: Cloud monitoring, management tools come up short", Network World, Mar 2019)*

SolarWinds helps you avoid purchasing new tools to gain performance insights across your on-premises, hybrid, and multi-cloud environments, and extends those capabilities into Microsoft Azure to help you:

- Monitor your commercial and custom applications, helping validate the experience of end-users, and assure the performance of the application and of the Azure IaaS / PaaS infrastructure on which it is hosted.
- Improve database performance with recommendations to help optimize and tune traditional, IaaS-deployed and modern Azure PaaS databases.

*Experience:* Web Performance Monitor, Pingdom

*Performance:* Server and Application Monitor, Server Configuration Monitor, AppOptics, Database Performance Analyzer, Network Performance Monitor

**Lift and shift operations can create unnecessary spend.**

Through 2020, 45% of organizations that perform lift-and-shift to cloud IaaS without optimization will be overprovisioned by as much as 55% and will overspend by 70% during the first 18 months.

*(Source: "Survey: Cloud monitoring, management tools come up short", Network World, Mar 2019)*

SolarWinds helps improve your on-premises virtual machines (VMs) before you move them to Azure, with recommendations to right-size over-provisioned VMs and eliminated zombie VMs, to help ensure you don't end up spending more than you need.

Virtualization Manager

**Unfettered spend on cloud a concern.** Through 2020, 45% of organizations that perform lift-and-shift to cloud IaaS without optimization will be overprovisioned by as much as 55% and will overspend by 70% during the first 18 months.

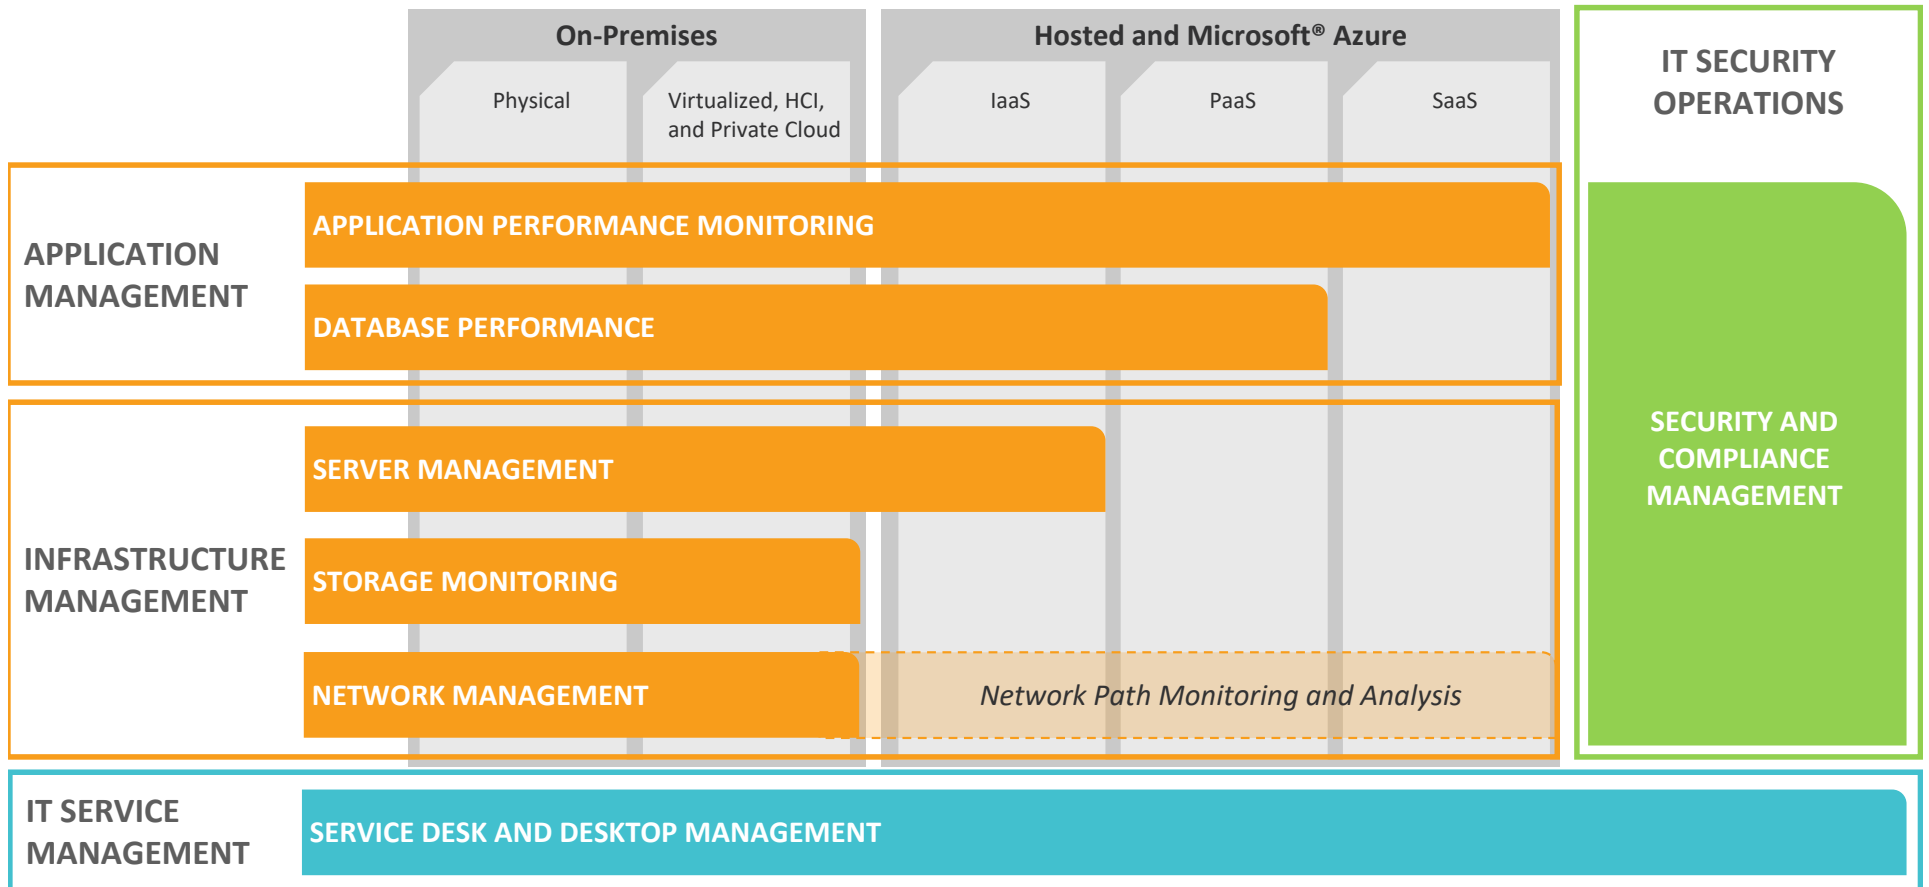

*(Source: "Ten Moves to Lower Your AWS IaaS Costs", Gartner, 20 Aug 2019)*

SolarWinds helps consolidate cost data from all your Azure subscriptions, helping you see what resources are deployed, and what each is costing you.
