

Softchoice VMware Licensing TechCheck

The Softchoice team is offering a complimentary VMware Licensing TechCheck using data from the VMware Installed Base Report (IBR) of your current VMware environment.

An IBR is a master list of all VMware licenses a company purchased - regardless of where the licenses were procured. This assessment provides visibility into all purchased licenses, end dates of support contracts and promotional products you may not be aware you own.

The Softchoice VMware Licensing TechCheck:

- Validates if your production environment is fully supported to identify gaps
- Mitigates risk by verifying your current VMware entitlements
- Establishes areas to streamline your renewal cycle
- Provides a summary with recommendations to enhance your implementation

Discovery

- Using an agent-less data collection tool that gathers information about your existing VMware Licensing environment

Analysis

- Softchoice VMware experts evaluate findings and consolidate the broad data sets into actionable insights that are validated with a client findings and recommendations session

VMware Workshop and Analysis Report

- Review business demands, current issues and future state goals
- Review risks and remediation through a guided data review and recommendations
- A structured review of the VMware Licensing TechCheck and evaluate options with a Softchoice Virtualization subject matter expert

Who should be involved

Softchoice recommends that clients assemble a cross functional IT team with a senior IT leader sponsor that provides alignment to the issues, business drivers and guides prioritization.

To arrange for a Softchoice VMware Licensing TechCheck, contact your Softchoice Account Manager to set up an appointment.
