

# Cyber Resilience Pro Plan

## Protection and Maximum Resilience

Protection against email-based threats is mandatory, but a more effective strategy requires a broader perspective. Mimecast Cyber Resilience Pro includes comprehensive protection at your perimeter and inside your network, but it doesn't stop there. With solutions that keep employees connected during an email outage, protection against malicious web activity, encryption & data loss prevention, and archiving, Mimecast has you covered. It's the ideal solution for organizations that want the most sophisticated protection available and the resilience to keep business flowing, no matter what.

### Key Benefits

- Safeguards your organization against threats from the number one attack channel
- Prevents the lateral and external spread of threats
- Integrates protection for web and email
- Reduces cyber risk with targeted training for the employees who need it most
- Makes end-users security assets, not liabilities
- Maintains productivity during cyber disruption
- Reduces complexity and administrator time
- Improves compliance and facilitates corporate governance

### Security You Can Count On

- Neutralization of malicious URLs, attachments, spam and malware.
- Prevention of account compromise to keep trusted senders from infecting others
- Quick remediation of threats from infected accounts
- Award-winning awareness training, proven to sharpen employee security reflexes so they can detect and avoid attacks
- Maintaining employee connectivity during planned or unplanned email outages
- Quick recovery of lost or stolen data
- Blocking employee access to malicious web sites and content
- Quick response to litigation and compliance issues
